

A mix of modern day lines and tradition, the 9'0" is a great all-around performance board by highly respected French longboard shaper Gérard Dabbadie.

The 9'4" and 9'6" represent more tradition style longboards with some modern day elements that make their ride smooth and easy. Great for the bigger guys on smaller days and the classic longboard stylists that like the drop-knee turn and walk to the nose. The 9'4" is also originally designed by Gérard Dabbadie while the 9'6" is by Darrell "Rooster" Dell from the Gold Coast, Australia.

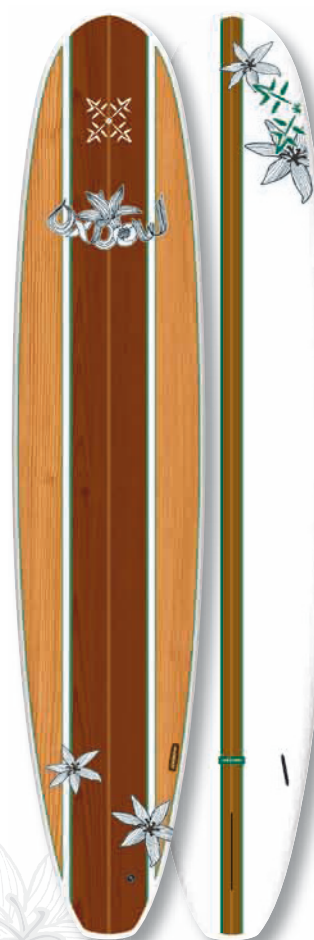

All OXBOW Longboards are glassed with 2 layers of 6oz fiberglass on the deck, a layer of 6oz fiberglass on the bottom and a 6oz patch over the fin area. They are then sanded and polished to a high gloss finish.
